^a Black shank resistance levels are based on a limited number of field tests and subject to change.

^b F or A refers to use as a fire-cured or air-cured variety. F/A indicates either use, with predominant use given first.

^c Relative yield and quality scores based on past performance under disease-free conditions. Relative yield and quality scores given on a 0-10 scale, with 10 being best for the predominant use.

^d Dash (-) means that resistance level is unknown or not rated at present.
