

## Power Outage and Flooding Resource Listings

Listed below are some suggested websites for information you may find particularly useful when answering questions and advising people during emergencies such as power outages and flooding. Several of these listings include topics related to other types of disasters and emergencies that occur during the year, such as tornados and fires. Keep this list handy for quick reference when questions dealing with emergency situations arise. Also, be sure to visit the EDEN (Extension Disaster Education Network) web site listed below for additional educational resources from Kentucky and throughout the nation related to various emergency and disaster events.
